Message from the State Health Commissioner

It is my pleasure to provide you with a copy of the fourth publication of the Virginia Department of Health, Center for Primary Care and Rural Health's *2000 Community Health and Resource Data Guide*. It is a collection of health-related data that identifies disparities and health outcomes for Virginia's citizens living in the 135 counties and independent cities in the Commonwealth. Using the most recent figures available the *Guide* provides a snapshot of a community's needs, resources and economic status that may influence access to primary health care. One of the features about the *Guide* is that it provides ranking and comparison to statewide levels to facilitate analysis of community needs to target resources and interventions where they are needed most to promote health access.

The *2000 Guide* has an added feature for its users, websites have been provided for persons and organizations that are seeking information for additional resources. The section on Community Resources and Safety Net Providers includes lists of local health districts, health care providers, and local services available. Users seeking the list of current federal medically underserved and health professional shortage area designations are encouraged to check the Bureau of Primary Health Care's website.

We hope that the indicators provided will be useful to communities, organizations and persons interested in promoting services to vulnerable populations throughout the Commonwealth. I encourage you to use this *Guide* as a supplement with other state and locally developed material that promote the Health Resource Service Administration, Bureau of Primary Health Care's goal of 100% Health Access and 0 Health Disparity.

Sincerely,

A handwritten signature in black ink, reading "E. Anne Peterson, M.D., MPH". The signature is fluid and cursive, with the first name "E. Anne" and last name "Peterson" clearly legible, followed by the credentials "M.D., MPH".

E. Anne Peterson, M.D., MPH

An overview of the measures included in the guide.

Land area in square miles.

Population density.

The total population for the county/city divided by the land area.

FIPS code.

The Federal Information Processing Standards is the standard code used by the Federal government to identify the counties and independent cities in Virginia (and other states). There are 135 counties and independent cities in Virginia. FIPS codes were used to organize this data guide. Some branches of the State government use codes that are similar to, but not identical with, the FIPS system to classify communities. FIPS codes were chosen because other coding systems could be readily translated into FIPS codes.

Detailed population breakdown.

These data were obtained from the US Census. They are estimates for the population in each FIPS community for 1999. Although the estimation algorithm is quite accurate, it is more accurate for larger communities and for larger subgroups within communities. Some caution should be exercised when using estimates for smaller subgroups in smaller communities.

Rates and ranks for each measure.

Rates represent the percents, actual numbers, adjusted rates, and so forth of each measure. Decisions about whether to present percents, numbers, or rates were based on the usual and customary presentation of these data in other sources and on how useful each type of measure would be.

Ranks represent the relative rank of a community within the State for each measure. All ranks are descending. That is, a rank of 1 indicates that a community had the highest rate in the State. Communities that had the same rates received the same ranks. This means that for some measures the highest rank is not 135.

Organization

The measures are presented in 8 categories: Health, Health care, Mortality, Numbers of youth and older adults, Five leading causes of death in a community, Economic well-being, Education, and Public safety. Every attempt was made to obtain the most current data available. The sources of each measure are described in Appendix A.

Some of the measures presented in the guide were not available for all communities. For per capita income, the Bureau of Labor Statistics provides single estimates for combinations of communities (e.g., Albemarle county and the city of Charlottesville). Similarly, some school districts include schools in more than one community (e.g., Williamsburg and James City county). Such joint measures are described in Appendix B.

Health

These measures describe important aspects of the physical health of the members of a community. There is an emphasis on pregnancy because of the importance of pregnancy in determining the later health of children and because of the potential costs associated with problematic pregnancies. There is also an emphasis on health problems that can be prevented. All the measures in this category were provided by the Virginia Department of Health and describe 1999.

Prenatal care first trimester – The percent of mothers who received prenatal care during their first trimester. Early prenatal care is critical to the health of mothers and children.

Low birth weight – The percent of children who were below 2500 grams at birth. Low birth weight is a risk factor for children's health and development.

Teen pregnancy – The number of live births to teenagers (women younger than 20) per 1,000 females. Teen mothers and their children are at greater risk for health and other problems than older mothers and their children.

Non-marital births – The percent of live births to unmarried women. Unmarried mothers and their children are at greater risk for health and other problems than married mothers and their children.

STD/100,000 – Cases of all sexually transmitted diseases (except HIV/AIDS) per 100,000 people. These counts include syphilis, gonorrhea, and chlamydia, diseases that are readily preventable.

HIV/100,000 – Cases of HIV and AIDS per 100,000 people. HIV and AIDS represent potentially very costly problems for communities.

Health care

Sentinel events: Ratio of expected to actual hospitalization – Sentinel events are hospital discharges associated with ambulatory-sensitive conditions that may have been prevented and managed successfully with outpatient care. A high ratio suggests that there may be problems with the primary care delivery system in a community. The present measure describes hospital stays for asthma, uncontrolled hypertension, uncontrolled diabetes, low birth weight, acute poliomyelitis, and rheumatic fever. By definition, the State ratio is 1.00. Communities with ratios above 1.0 had a larger than expected number of hospitalization for these conditions, and communities with ratios less than 1.0 had fewer hospitalizations than expected. Ratios are gender and age adjusted. These data were provided by the Williamson Institution, Medical College of Virginia and describe 1998.

Sentinel events: Diabetes and hypertension – In addition to the overall measure of Sentinel events, individual ratios for diabetes and hypertension are also provided.

Workmen's compensation costs – Total costs for workmen's compensation claims for 1998. These data were provided by the Virginia Workers' Compensation Commission.

Mortality

These measures describe the rate in a community of some of the leading causes of death (leading defined in terms of the State). Rates for death from heart disease, lung cancer, COPD, unintentional injury, and suicide are age-adjusted and are given in terms of deaths per 100,000 people. These measures were provided by the Virginia Department of Health and describe 1998.

Infant deaths/1,000 live births – Number of children who died before age 1 per 1,000 live births.

Heart disease – Number of people who died from some form of heart disease.

Lung cancer – Number of people who died from some form of lung cancer.

COPD – Number of people who died from some form of chronic obstructive pulmonary disease such as emphysema.

Unintentional injury – Number of people who died from some form of accident.

Suicide – Number of people who took their own lives.

Number of youths and older adults

These measures represent the number and percent of people of youth and older adults in a community. These data were obtained from the US Census and are estimates for 1999

Five leading causes of death

For each community, the five leading causes of death in that community (and their age-adjusted rates per 100,00) are given. These rates are unranked within the State. These data were provided by the Virginia Department of Health and describe 1998.

Economic well-being

Fiscal stress index – The Fiscal Stress Index represents a community's overall fiscal well-being. The index combines per capita revenue capacity, revenue effort, and adjusted median income. High stress is less desirable than low stress. The measure was provided by the Virginia Commission on Local Government and describes 1998.

Per capita income – The average income (from all sources) for a person in the community. These data were provided by the Bureau of Labor Statistics and describe 1998.

Unemployment – The seasonally adjusted unemployment rate for a community. These data were provided by the Bureau of Labor Statistics and describe 1999.

People 100% below poverty – The percent of people in a community whose income is at or below the 100% poverty level as defined by the US Census. These data were obtained from the US Census and are estimates for 1998.

People 200% below poverty – The percent of people in a community whose income is at or below the 200% poverty level as defined by the US Census. These data were obtained from the US Census and are estimates for 1998.

People receiving Medicaid – The total number of people in a community receiving some form of Medicaid. These data were provided by the Virginia Department of Medical Assistance Services and describe 1999.

Children receiving free school lunch – The percent of children in a school district who were eligible for free or reduced lunch. These data were provided by the Virginia Department of Education and describe 1998.

Children enrolled in CMSIP – The number of children in a community enrolled in Children's Medical Security Insurance Plan. These data were provided by Virginia Department of Social Service and describe 1999.

Education

These data were provided by the Virginia Department of Education and describe 1999 except for per pupil expenditures which describe 1998.

High school dropouts – The percent of students who dropped out of high school.

Students going to college – The percent of graduating seniors who had two or four year college plans.

Students with special needs – Percent of students who received some form of special education.

Per pupil expenditure – Total per pupil expenditures including local, state and federal sources.

SOL – Grade 5 – The percent of children who passed the Standards of Learning exams averaged across the four exams given in Grade 5: English, mathematics, history, science. The SOL for fifth grade were chosen because research suggests that problems in basic skills at this time constitute a risk factor for problems later.

Public safety

Measures of crime in a community. These data were provided by the Virginia State Police and describe 1999.

Violent crime – The number of violent crimes committed in a community. Violent crimes were defined as homicide, manslaughter, forcible rape, aggravated assault, and robbery.

Crimes committed by juveniles – The percent of all crimes committed by juveniles (people under the age of 18).

Appendix A: Combined data presentation

1. Communities for which per capita income was combined.

Albemarle and Charlottesville	Montgomery and Radford
Alleghany, Clifton Forge, and Covington	Pittsylvania and Danville
Augusta, Staunton, and Waynesboro	Prince George and Hopewell
Bedford and Bedford City	Prince William, Manassas, and Manassas Park
Campbell and Lynchburg	Roanoke and Salem
Carroll and Galax	Rockbridge, Buena Vista, and Lexington
Dinwiddie, Colonial Heights, and Petersburg	Rockingham and Harrisonburg
Fairfax, Fairfax City, and Falls Church	Southampton and Franklin
Frederick and Winchester	Spotsylvania and Fredericksburg
Greensville and Emporia	Washington and Bristol
Henry and Martinsville	Wise and Norton
James City and Williamsburg	York and Poquoson

2. Communities for which educational measures were combined.

Alleghany Highlands and Clifton Forge
Bedford and Bedford City
Fairfax and Fairfax City
Greensville and Emporia
James City and Williamsburg

The Department of Education provides separate measures for the West Point and Colonial Beach school districts. The West Point measures were combined with those for New Kent and the Colonial Beach measures were combined with those for Westmoreland.

Also, people receiving Medicaid is combined for Bedford City and Bedford County.

Virginia Health Access Network

Virginia Health Access Network (VHAN) is a partnership of Virginia based organizations dedicated to improving access to health services for Virginia's vulnerable populations. VHAN members include organizations that promote access to health services but do not provide direct clinical care. VHAN serves as the interactive communications link that connects member organizations with each other and Virginia communities. Strengthening Virginia's primary care workforce is a continuing priority of VHAN members. Its goal is to make Virginia's health care system more navigable for all Virginians. The Virginia Department of Health, Center for Primary Care and Rural Health has provided funding and collaborative support for the following programs.

<http://www.vhan.org/>

VHAN Partners' Statewide Projects and Web Sites

Virginia Tech Institute for Community Health (ICH) has developed an inventory of over 600 Community Health Coalitions within Virginia. These are collaborative partnerships comprised of community members with representatives from business, local legislators, community residents, health agencies, the faith community, social service agencies, community service boards, non-profits and other community specific leaders. Contact Sharon Dwyer at 540-231-2451 <http://www.spia.vt.edu/ich/coalitions.htm>

Virginia Tech Institute for Community Health has a listing of over 3000 Community Health Advisors (CHA). The Institute provides curriculum and training to CHAs who help individuals and groups take greater control over their health and their lives. They help community residents understand and access formal health and human service systems. The CHA programs, in their many forms, attempt to improve the health of people through better use of their own and other resources.

Contact: Sharon Dwyer at 540-231-2451

<http://www.spia.vt.edu/ich/communityhealthadvisors.htm>

Primary Practice Opportunities, Virginia's primary care recruitment website is a product of the VHANetwork partnership between the VDH Center for Primary Care & Rural Health and the Blue Ridge Area Health Education Center. This website offers site opportunities to physicians, psychiatrist, nurse practitioners and physician assistants.

For direct information and service contact the Center's recruiter at 800-694-7349 or 804-786-4234

<http://www.ppova.org/>

Southwest Virginia Graduate Medical Education Consortium (GMEC)

The mission is to improve access to high quality primary care for citizens of Southwest Virginia by forming educational partnerships between communities, local physicians, and primary care residency programs in a five state region – Virginia, Tennessee, North Carolina, Kentucky, and West Virginia.

Contact: Tony Lawson at 540-328-0249

<http://www.wise.virginia.edu/gmec/index.html>

Virginia Health Access News and Network Website was developed by the Rappahannock Area Health Education Center serving as a link to sites of Network partners as well as sites relevant to health workforce and health access issues.

Contact: Jane M. Wills at 804-493-0818

<http://www.rahec.net/>

Multicultural Health Network. The focus of this Network is strengthening the connections among health professional involved with multicultural populations in Virginia to facilitate communication among these providers, the AHECs, and migrant and immigrant service organizations. In addition, Community Health Interpreter Service, a certified program provided by the Northern Virginia Area Health Education Center, offers continuing education for health professionals involved with multicultural populations in Virginia.

Contact: Lyn Hainge at 703-750-3248 or 703-750-3072.

Rural Minority Health Network (RMHN) was developed by the Southside Area Health Education Center and serves as a comprehensive resource for information on issues related to racial and ethnic minority health in a rural setting. This web site is in partnership with the VDH Center of Primary Care & Rural Health and the Office of Minority Health.

Contact: RMHN at 804-493-0822 <http://www.lwc.edu/varmh>

Health Literacy Network was developed by the VTECH, Institute of Community Health. Products include a website for health literacy, a network for health communication materials and consultation and advice, and resource materials to address general health literacy topics, as well as specific health issues and needs, with diverse audiences.

Contact: Sharon Dwyer at 540-231-2451 <http://www.spia.vt.edu/ich/healthlit.htm>

The Virginia Statewide Area Health Education Centers (AHEC) Program. Since 1991 the AHEC Program has been an effective component in the Commonwealth's efforts to ensure an appropriate primary health care workforce. Virginia's eight-community AHEC's strive to assess the specific health care needs of their communities and to develop effective programs designed to meet those health care needs. Its mission is to promote health careers and access to primary care for medically underserved populations through community-academic partnerships.

Virginia Perinatal Councils

The Regional Perinatal Councils are a Virginia Department of Health initiative. They constitute a statewide network of public/private partnerships that assess the needs of infants and women of reproductive age. Their purpose is to coordinate community health care systems that serve women and infants and to develop improved solutions to achieve healthier infant outcomes. There are seven regional councils led by various perinatal health related organizations. Individuals and organizations that participate in these efforts include parents, health professionals, medical school faculty, health and human services organizations, religious groups, businesses, schools, and community leaders.

Jurisdictions Served: Counties of Accomack & Northampton.

Appendix D: “Safety net” providers

Virginia Primary Care Association Membership Roster (as of 11/7/00)

Community Health Centers (CHCs) are nonprofit, private corporations located in medically underserved areas that provide comprehensive primary health care to anyone seeking care. In addition to treating individual patients, health centers emphasize health promotion and disease prevention for entire communities. A Community Health Center does not deny anyone primary health care services - all community residents have equal access regardless of ability to pay, geographic locations/residence, culture, age, sex or religion.

The three key aspects of CHCs -- universal access, cost effectiveness and community governance - continue to prove to be the most effective long term solution for meeting primary health care needs in medically underserved areas. As Federally Qualified Health Centers (FQHC), CHCs provide a wide range of services to their patients. Among the core services are:

physician care	X-ray	laboratory	preventive services (mammography, well child, etc.
immunizations	transportation for health services	case management	specialty referrals

Some CHCs also offer inpatient physician care and dental care. Additionally, to maximize limited resources, CHCs develop linkages in the community with other private and public providers, pharmacies, nursing homes, and local business.

For additional information on Community Health Centers, please contact the

Virginia Primary Care Association
10800 Midlothian Turnpike, Suite 265
Richmond, VA 23235
804-378-8801 Fax: 804-379-6593

Appendix E: HPSA and MUA

FEDERAL SHORTAGE DESIGNATIONS

Shortage designations are based on the evaluation of criteria established through regulation to identify geographic areas or population groups with a shortage of primary health care services. There are two types of shortage designations, each linked to a BPHC activity or function. The shortage designations are:

- **Health professional shortage area (HPSA)** designation, which is a prerequisite to apply for National Health Service Corps recruitment assistance. The HPSA designation criteria includes primary medical care, mental health, and dental care.
- **Medically underserved areas/populations (MUA/Ps)** designation, which is a prerequisite to requesting grant awards to plan, develop, and operate a community health center under section 330 of the Public Health Service Act.

BACKGROUND

Section 332 of the Public Health Service Act provides that the Secretary of Health and Human Services shall designate health professional shortage areas, or HPSAs, based on criteria established by regulation. The authority for designation of HPSAs is delegated to the Bureau of Primary Health Care's Division of Shortage Designation (DSD). Criteria and the process used for designation of HPSAs were developed in accordance with the requirements of Section 332. Designation as a HPSA is a prerequisite to application for National Health Service Corps (NHSC) Recruitment assistance.

The HPSA criteria require three basic determinations for a geographic area request: (1) the geographic area involved must be rational for the delivery of health services, (2) a specified population-to-practitioner ratio representing shortage must be exceeded within the area, and (3) resources in contiguous areas must be shown to be overutilized, excessively distant, or otherwise inaccessible. These criteria have been defined for shortage of primary medical care physicians, dentists, and mental health professionals. The particular level used to indicate primary medical care, dental, and mental health shortage is referenced in the Criteria for Designation of HPSAs, codified at [42 CFR Chapter 1, PART 5 - DESIGNATION OF HEALTH PROFESSIONAL\(S\) SHORTAGE AREAS, 10-1-93 edition.](#)

Where a geographic area does not meet the shortage criteria, but a population group within the area has access barriers, a population group designation may be possible. In such cases the population group and the access barriers must be defined/described, and the ratio of the number of persons in the population group to the number of practitioners serving it must be determined. These ratios are also referenced in the Criteria for Designation of HPSAs.

In some cases, facilities may be designated as HPSAs. This applies to correctional facilities and to State mental hospitals. In addition, public and non-profit private facilities located outside designated HPSAs may receive facility HPSA designation if they are shown to be accessible to and serving a designated geographic area or population group HPSA.

STATE MEDICALLY UNDERSERVED AREA DESIGNATION

The **Virginia Medically Underserved Area (VMUA)** shortage designation is based on the evaluation of criteria defined in accordance with the Rules and Regulations (12VAC5-540-10 et seq.). The following criteria are used to designate a VMUA - (1) primary care physicians to population ratio, (2) percent of the population with income at or below 100% of the federal poverty level, (3) percent of the population 65 years of age or older, (4) five-year average infant mortality rate, and (5) the most recent annual civilian unemployment rate. Data for these areas are updated periodically.

Applicable programs that use this designation are: Virginia Medical Scholarship Program, Virginia Medical Loan Repayment Program, Nurse Practitioner/Nurse Midwife Scholarship Program

Programs and Grants that Use Medically Underserved Area (MUA) or Health Professional Shortage Area (HPSA) as a Requirement, Criteria or other Screen.

Program Title and Description	How HPSA Or MUA Designations Is Used In Determining Need For Program	Enabling Legislation	Contacts & Est. Funding FY99
1. PROGRAMS THAT INCREASE THE NUMBER OF HEALTH CARE PROVIDERS IN UNDERSERVED AREAS			
<u>National Health Service Corps</u> The NHSC increases access to primary health care services in HPSAs. The NHSC was initiated through the Emergency Health Personnel Act, Amendments of 1987. The HPSAs designation was originally set up to specify areas eligible for NHSC participation. A NHSC participant must be located in a HPSA designated as needing the same provider type. If located in a population designation, the practice must provide care to the designated population at a specified level. Data generated from the designation process is also used to determine how many NHSC members an area is eligible for and to screen out low priority areas. Specific programs include:			
<u>National Health Service Corps Scholarship Program (93.288)</u> provides scholarships for tuition, fees and other expenses to students in health professions. Participating students must contact to serve in an HPSA for one year for each year of support with a minimum obligation of 2 years. At this time, students of allopathic and osteopathic medicine, Family NP, nurse Midwifery and primary care PAs are eligible.	NHSC must be located in a HPSA designation for the same provider type. If located in a population designation, the practice must provide care to the designated population at a specified level. Data generated from the designation process is also used to determine how many NHSC members an area is eligible for and to screen out low priority areas. NHSC designates high priority sites from HPSAs and recipients are matched with sites based on	National Health Service Corps Act, 1987 & 1990 Amendments; PHS Act, Title III, Sections 331 thru 338A & 338C thru 338H.	Chief, Loan Repayment Programs Branch, Division of Scholarships and Loan Repayments, BPHC, (301) 594-4400 (or 1-800-638-0824
<u>National Health Service Corps Loan Repayment Program (93.162)</u> provides for the repayment of educational loans for individuals who have completed graduate or under- graduate training in a health profession. Participants contract to practice in an approved loan repayment program service site in a HPSA for one year for each year of support with a minimum obligation of 2 years. The program provides a tax assistance payment of 39% for each year of service.	NHSC designates selected HPSAs as "loan repayment program service sites". Priority is given to health professions trained in a discipline needed by NHSC and who show commitment to continued service in underserved areas. Participants must serve for a minimum of two years.	National Health Service Corps Act, 1987 & 1990 Amendments; PHS Act, Title III, Sections 338B	Chief, Loan Repayment Programs Branch, Division of Scholarships and Loan Repayments, BPHC, (301) 594-4400
<u>Grants for State Loan Repayment (93.165)</u> provides a 50% matching grant to states to operate a program for the repayment of student loans for health professionals similar to the federal program. States must follow the NHSC Criteria but can develop further criteria for locating recipients in high priority areas.	States can develop criteria for prioritizing HPSAs as State Loan Repayment Program (SLRP) practice sites within the requirements of the federal program. In Washington, priority is based on: service to underserved and remote populations; location in a high need area; high vacancy rate, etc	National Health Service Corps Act, 1990 Amendments; PHS Act, Title III, Section 3381	Chief, Loan Repayment Programs Branch, Div Scholarships and Loan Repayments, BPHC, (301) 594-4400

<p><u>Community Scholarship Program (Demonstration Grants to States for Community Scholarships (93.931)</u></p> <p>grants funds to increase delivery of primary care in urban and rural HPSAs. Funds are provided to community for scholarships. Recipients must contract to provide a year of health for each year they receive a scholarship with a minimum of two years. Scholarship can be provided for MD, NP, CNM, or PA training in internal or family medicine.</p>	<p>Service must be done in HPSA designated areas with a shortage in the recipients field. This program is not funded at this time. It may be reestablished during HNSC reauthorization.</p>	<p>Disadvantaged Minority Health Improvement Act of 1990; PHS Act, Title III, Section 338L</p>	<p>Chief, Loan Repayment Programs Branch, Division of Scholarships and Loan Repayment, PHC; (301) 594-4400</p>
<p>Medicare Incentive Payments Program Under this program, HCFA gives a 10 percent bonus payment for Medicare-reimbursable physician services provided within geographic HPSAs. It also provides higher "Customary Charges" for New Physicians in HPSAs. The law directs HCFA to exempt new physicians opening practices in non-metropolitan, geographic HPSAs from new Medicare limitations on "customary charges".</p>	<p>Service must be provided within a designated HPSA.</p>	<p>Public Law 100-203, Section 4043 and Section 4047.</p>	
<p>*Nursing Education Loan Repayment Program (NELRP) (93.908) Grants are meant to assist in the recruitment and retention of professional nurses in Eligible Health Facilities (EHFs). All participants must enter into a contractual agreement to provide full-time clinical care in an approved EHF located in a HPSA with a shortage of nurses. In exchange, for a 2-year service commitment, the NELRP will pay 60 percent of the participant's total qualifying educational loan balances</p>	<p>Participants must contract to serve in an Eligible Health Facility. EHF's are identified by and must be located in a HPSA. They can include: Public Hospitals; Migrant Health Centers; Community Health Centers; Rural Health Clinics.</p>	<p>Section 846 of the Public Health Service (PHS)</p>	<p>Nursing Education Loan Repayment Program, BPHC 301/549-4400</p>
<p>Mental Health Clinical and AIDS Service-Related Training Grants (93.244) encourages mental health specialists to work in areas where severe shortages exist; increase the number of minority personnel in the mental health professions, and the number of mental health personnel trained to deal with special populations including rural populations.</p>	<p>No criteria listed for selecting proposals lists HPSAs, MUAs or other shortage areas. However, the first objective listed is to encourage specialist to work in areas where severe shortages exist.</p>	<p>PHS Act, Title III, Section 303; Public Law 78-410</p>	<p>Anne Mathews-Younes, Human Resource Planning and Development Branch, Center for Mental Health Services, SAMHSA, DHHS; 301/443-5850</p>
<p>J-1 Waiver Program Foreign medical graduate can enter the US for residency training with a J-1 Visa if they return to their own country at least 2 years after their training is completed. A J-1 Wavier allows these graduates to remain and practice medicine if they do so in an HPSA .</p>	<p>Physicians receiving a J-1 waiver must sign a contract to practice for 3 years in a HPSA. The USDOA also has a J-1 Waiver program which they administer separately from the states. They require that service be done in a rural HPSAs.</p>		<p>Immigration and Naturalization Service or USDOS.</p>

2. PROGRAMS THAT PROVIDE FINANCIAL SUPPORT TO UNDERSERVED AREAS			
<p>Programs/Grants for Health Centers - PHS Act, Title 3, Section 330: Grants given under this section are for health centers which are defined as “an entity that serves a population that is medically underserved, or a special medically underserved populations comprised of migratory and seasonal agricultural workers, the homeless and residents of public housing by providing”...primary health services and other supportive services as appropriate...” “Medically underserved populations” are defined as the population of an area designated as an area or population with a shortage of personal health services. Medically underserved populations are designated by the DHHS. A state may also recommend designation based on unusual local conditions that limit access to or availability of primary health services.</p>			
<p>Community Health Center Grants (93.224) provides grants to public organizations to establish and operate community health centers (CHCs) and health networks in medically underserved areas (MUAs). CHCs provide primary and preventive health care including dental care, preventive care, prenatal and ancillary services such as laboratory tests, pharmacy services, etc. Centers can also provide services to facilitate access such as transportation and translation.</p>	<p>A CHC must be located in an area designated as a MUA or MUP. Priority is given to providing services in the most underserved areas and maintaining existing centers serving high priority populations.</p>	<p>Health Centers Consolidation Act of 1996; PHS Act, Title 3, Section 330(c)(d) & (e)</p>	<p>Richard C. Bohrer, Director, Community and Migrant Health , BPHC, 301-594-4300,</p>
<p>Migrant Health Program (93.246) provides funding to public or non-profit organizations to establish and operate Migrant Health Centers (MHCs). MHCs provide access to medical care services to migrant and seasonal farmworkers and their families. In addition to the services provided by CHCs, MHCs can provide environmental health care. Requirement for some services may be waived with a showing of good cause.</p>	<p>MHCs provide primary health services to a special medically underserved population – migratory agricultural workers. MHCs must provide service to this population within a designated catchment area.</p>	<p>The Migrant Health Act; PHS Act, Title 3, Section 330(g)</p>	<p>Adolfo Mata, Director, Migrant Health Program, 301/594-4303</p>

Medically underserved populations are designated by the DHHS. A state may also recommend designation based on unusual local conditions that limit access to or availability of primary health services.</p>			
<p>Community Health Center Grants (93.224) provides grants to public organizations to establish and operate community health centers (CHCs) and health networks in medically underserved areas (MUAs). CHCs provide primary and preventive health care including dental care, preventive care, prenatal and ancillary services such as laboratory tests, pharmacy services, etc. Centers can also provide services to facilitate access such as transportation and translation.</p>	<p>A CHC must be located in an area designated as a MUA or MUP. Priority is given to providing services in the most underserved areas and maintaining existing centers serving high priority populations.</p>	<p>Health Centers Consolidation Act of 1996; PHS Act, Title 3, Section 330(c)(d) & (e)</p>	<p>Richard C. Bohrer, Director, Community and Migrant Health , BPHC, 301-594-4300,</p>
<p>Migrant Health Program (93.246) provides funding to public or non-profit organizations to establish and operate Migrant Health Centers (MHCs). MHCs provide access to medical care services to migrant and seasonal farmworkers and their families. In addition to the services provided by CHCs, MHCs can provide environmental health care. Requirement for some services may be waived with a showing of good cause.</p>	<p>MHCs provide primary health services to a special medically underserved population – migratory agricultural workers. MHCs must provide service to this population within a designated catchment area.</p>	<p>The Migrant Health Act; PHS Act, Title 3, Section 330(g)</p>	<p>Adolfo Mata, Director, Migrant Health Program, 301/594-4303</p>

<p>Homeless Populations (93.151) provides grants to provide for primary health services and substance abuse services to homeless individuals and families including homeless children. Residents of Public Housing (93.927) provides grants to improve minority access to primary care services and reduce infant mortality for residents of public housing.</p> <p>Section 330(f) provides for grants to address infant mortality. However, no grant programs were found that were authorized under this section.</p>	<p>While these programs are authorized under Section 330, which is intended to provide service to MUA/MUPs, subsections 330(h) and (l) refer to special MUPs. The grant programs do not require or reference MUA/MUPs. They do consider justification of need based upon demographic and/or health status indicators. Migrant workers are also considered a special MUP but designation is required. Apparently, a distinction was made based on the fact that MHC grant must service a designated catchment area while homeless and public housing grants do not have to.</p>	<p>Health Centers Consolidation Act of 1996 (Public Law 104-299); PHS Act, Title 3, Section 330(h) & (l).</p>	<p>Dr. Regan Crump, Director, Division of Programs for Special Populations, BPHC; 301/594-4420</p>
<p>Rural Network Development Program (93.912) funds are provide to expand access to, coordinate, restrain the cost of, and improve the quality of essential health services, including preventive and emergency services, through development of integrated health care delivery systems or networks in rural areas and regions. Grants are made to rural public or non-profit private entities that include three or more health care providers or other entities that provide or support the delivery of health care services.</p>	<p>The program is meant to benefit medically underserved populations in rural areas. The administrative headquarters of the grantee must be in a rural county or a rural census tract. Otherwise the organization must exclusively provide services to a MHC under section 330(g) or be a Native American Tribal or quasi-tribal entity for services delivered on reservation or recognized tribal lands.</p>	<p>Health Centers Consolidation Act; PHS Act, Title III, Section 330A(c)</p>	<p>Ms. Eileen Holloran, Grant Programs Coordinator, ORHP, (301) 443-7529</p>

Acknowledgments

Preparation of this data guide required the help and collaboration of many people, and we are grateful for the help we received over the months that it took to prepare the guide. Many of the people who helped us are mentioned in Appendix B (data sources), although some are not mentioned, and some who were mentioned in the Appendix merit additional acknowledgment because of the unusual amount of help they provided. B. A. Caro-Justin, program coordinator of the Center for Primary Care and Rural Health, supervised this project and provided excellent leadership and suggestions. Also, the project review committee, Ken Studer, Kathy Wibberly, and Norma Marrin of the Center, provided invaluable assistance to us. Of those mentioned in Appendix B, Ron Hyman (Virginia Department of Health) was particularly generous with his time. We are also grateful to Deirdre Justin for designing the cover page.
